

SBS | small business IT support

Its really simple...

- ✓ Immediate remote support
- ✓ No contract, no extra cost, no fuss
- ✓ Fixed fee of £325 includes 5 hours support time
- ✓ No call out fee for on-site work
- ✓ Remote and on-site support included
- ✓ All our engineers are Microsoft Certified
- ✓ Davis IT Solutions are Microsoft Small business specialists
- ✓ Hardware and software supplied at discounted rates

Any business with up to ten PCs\laptops and a maximum of one server qualifies for small business support (our Gold support option is available for larger customers).

How it works:

Purchase one block of support time up front (£325+vat) and that's it, you're covered. The 5 hours support time can be used whenever you like.

If an on-site visit is required it's all included in the fee. We let you know how much time has been used and detail all work carried out.

Instant support is provided with our remote support tools. We can be logged on to your systems within a minute of being contacted.

Concentrate on running your business knowing all IT systems are covered and experienced help is on hand immediately. Our engineers have previously worked for IBM and Intel.

Full customer references provided, call our existing customers and see how they rate the service they receive.
